-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the abstract is not generally limited to a single paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Art Unit: 2642

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Molne (U.S. Patent No. 5,999,811).

Regarding claims 1 and 17, Molne teaches a method for identifying a subscriber in a first and a second telecommunication network, wherein the subscriber possesses a mobile telephone station having a subscriber identification module, said subscriber identification module comprising means to be identified on the first telecommunication network under a first identity, as well as means to be identified on the second telecommunication network under a second identity, said method comprising:

defining the first telecommunication network as a priority with respect to the second telecommunication network (column 3, lines 1-20);

checking to see whether the mobile telephone station is inside a coverage field of the first telecommunication network when the subscriber identification module is currently identified on the second telecommunications network, said checking being made by regularly re-initializing the mobile telephone station (column 3, lines 21-32); and

automatically identifying the subscriber identification module on the first telecommunication network under the first identity when the mobile telephone station is in the coverage field of the first telecommunication network (column 4, lines 16-35).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2642

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudolf et al. (WO 98/10614) in view of ATT (EP-A-0 779753).

Examiner agrees with written opinion on International Preliminary Examination Report of PCT/FR00/00423 cited by Application.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reynolds et al. (U.S. Patent No. 6,826,414) teach a mobile communications system having a cellular communications network comprising a public network portion and a private network portion using a common radio interface protocol.
